

MEDIKAMENT

Recombinant Proteins & IVD Biomarker Raw Materials

Product Catalog & Specification Summary

Edition 2026-09-14

This catalog lists the analytes we supply and the specifications available for each. Prices are quoted per order rather than published, because quantity, purity grade, format and destination each move the cost materially.

Contact

Hainan Medikament Trading Co., Ltd., 6-A-502, Baoyuanhuayuan, Xiuying Avenue 18, Xiuying District, Haikou 570100, Hainan, China

For research use and in-vitro diagnostic development only. Not for human or animal therapeutic use.

Product list

Human Recombinant Soluble ST2 (sST2 / IL1RL1)

[Cardiac & Inflammatory](#) | [Recombinant protein](#) | [UniProt Q01638](#)

Purified recombinant soluble ST2 - the receptor for IL-33 and a key cardiac-stress / inflammatory biomarker. For assay development, calibration and research.

Documentation: lot-specific CoA with each batch; SDS/MSDS and HPLC/MS data on request. Price: on request.

Recombinant Cardiac Troponin I (cTnI)

[Cardiac & Inflammatory](#) | [Recombinant protein](#) | [UniProt P19429](#)

Purified recombinant human cardiac troponin I - the cornerstone myocardial-injury marker, for calibrators, controls and assay development.

Documentation: lot-specific CoA with each batch; SDS/MSDS and HPLC/MS data on request. Price: on request.

Purified D-dimer Antigen

[Cardiac & Inflammatory](#) | [Human plasma derived](#)

Plasma-derived D-dimer antigen - the coagulation companion to our cardiac panel, for calibrators, controls and immunoturbidimetric / lateral-flow development.

Documentation: lot-specific CoA with each batch; SDS/MSDS and HPLC/MS data on request. Price: on request.

TRIS Base and TRIS-HCl, High-Purity Biological Buffer

[Research Reagents](#) | [IVD raw material](#)

High-purity TRIS buffers for IVD reagent formulation, protein purification and molecular biology.

Documentation: lot-specific CoA with each batch; SDS/MSDS and HPLC/MS data on request. Price: on request.

HEPES, High-Purity Biological Buffer

[Research Reagents](#) | [IVD raw material](#)

High-purity zwitterionic buffer for cell culture, enzyme assays and diagnostic reagent formulation.

Documentation: lot-specific CoA with each batch; SDS/MSDS and HPLC/MS data on request. Price: on request.

MES Monohydrate, High-Purity Biological Buffer

[Research Reagents](#) | [IVD raw material](#)

High-purity low-pH buffer (pKa 6.1) for enzyme and conjugation chemistry.

Documentation: lot-specific CoA with each batch; SDS/MSDS and HPLC/MS data on request. Price: on request.

Broad-Spectrum IVD Reagent Preservative

[Research Reagents](#) | [IVD raw material](#)

Water-soluble broad-spectrum preservative for multi-dose IVD reagents, calibrators and controls.

Documentation: lot-specific CoA with each batch; SDS/MSDS and HPLC/MS data on request. Price: on request.

How to order

- Send the analyte, quantity, target purity and destination country. If you are unsure of the right format, describe the downstream application instead and we will recommend a specification.
- You receive a quotation within one business day: price, available packaging, lead time and the document package for the lot we would ship.
- In-stock items are typically dispatched within 3-5 business days; custom and bulk quantities take longer and are confirmed on the quotation.
- Documentation with every shipment: commercial invoice, packing list and Certificate of Analysis. SDS/MSDS, HPLC/MS data and certificate of origin on request.

Institutional and distributor purchasing

We accept institutional purchase orders and work with regional distributors in selected markets. Payment terms are confirmed per quotation.

For research use and in-vitro diagnostic development only. Not for human or animal therapeutic use.
