SPECIFICATION SHEET

Catalog #: L2L004 **Lot #:** L171101

Description: Human Collagen Type IV Solution (Human)

Source: Human placenta

Background: Collagen IV is a major constituent of the basement membranes along with

laminins, proteoglycans and enactins. It is a multimeric protein composed of 3 alpha subunits. These subunits are encoded by 6 different genes, alpha 1 through alpha 6, each of which can form a triple helix structure with 2 other subunits to form type IV collagen. It can form insoluble fibers with high tensile strength. Collagen IV is useful in detecting the loss of parts of basement membranes in

carcinomas.

Purification: Purified.

Concentration: For 1mg reconstitute by adding 1ml DD water to 1.0mg/ml

Buffer: Sterile filtered liquid in 0.5M CH3COOH

Preservative: None

Applications: User optimized

Storage: Store at –20°C. Avoid multiple freeze/thaw cycles.
